Where the magic happens

As a design studio, we wanted to create an area that showcases our design and styling abilities. From lighting, flooring, and wallpaper to the furniture, colour contrasts and even the rugs, we wanted our space to serve as a theatre of interior design. This approach allows us to give our clients an experience of the textures, styles and finishes that we propose to them. The space also displays our understanding of heritage, an ode to South Africa's history and our ability to bring spaces to life through colour and dimension. We are also a young team, so the space needs to inspire the designers and challenge our thinking at all times. It's our design haven!
